V KAVYA SRI

vadlakavyasri3@gmail.com | +919502574038 | www.linkedin.com/in/vadlakavyasri | Bengaluru, India

PROFESSIONAL SUMMARY

Computer Science professional with **1.5 years of experience as an ML Data Associate I** and hands-on experience in **Frontend Development using HTML, CSS, and JavaScript**. Passionate about building **user-friendly UI, interactive web applications, and intuitive user experiences**, with experience developing an internal **AWS Bedrock evaluation dashboard**. Strong foundation in **Java, SQL, OOP, and problem-solving**.

PROFESSIONAL EXPERIENCE

ML Data Associate I, Amazon **October 2024 – Mar 2026**

CORE RESPONSIBILITIES

- Maintained **100% productivity and 95% reliability** while consistently following defined processes and quality standards across 15+ months of AI model support.
- Evaluated **thousands of LLM-generated responses weekly** for prompt routing, agent actions, hallucinations, policy compliance, and Responsible AI guidelines.
- Conducted **error analysis and edge-case evaluations** to improve annotation quality, dataset consistency, and overall model reliability.
- Used **Amazon SageMaker and Appen** for annotation, testing, and validation, while supporting junior annotators with evaluation guidelines and process improvements.

FRONTEND DEVELOPER – AWS BEDROCK | AMAZON

- Worked as a **Frontend Developer** to design and develop an internal **Generative AI evaluation dashboard** using **HTML, CSS, and JavaScript** for AWS Bedrock workflows, providing associates with a centralized interface to access evaluation information.
- Developed **JavaScript-based interactive features and search functionality** to help associates quickly access evaluation guidelines, parameters, examples, and clarification content.
- Designed user-friendly interfaces to organize evaluation parameters such as **Clarity, Accuracy, Consistency, Fairness, Creativity, Engagement, Error Recovery, and Ethical Compliance,** which we used in our process.
- Organized and presented **SOP guidelines, main and sub-cases, complex cases, edge cases, clarified examples, and query updates through the dashboard for easier reference.**
- Collaborated with **SME experts and annotation teams** to incorporate guideline updates and clarify complex and edge-case scenarios, **translating these requirements into frontend solutions** that enabled associates to access and understand the relevant information more efficiently.
- **Technologies:** HTML, CSS, JavaScript, MySQL, AWS Bedrock

TECHNICAL SKILLS

- **Programming & Data:** Python, Java, SQL, MySQL, Pandas, NumPy, Data Validation, Data Processing, Data Analysis, Automation
- **ML & Annotation:** ML/GenAI, LLM Evaluation, Annotation Operations, Data Quality, Error & Edge-Case Analysis, Metrics Validation
- **AWS & Tools:** AWS SageMaker, Amazon Bedrock, Appen, Git, Linux/Unix Shell, Advanced Excel
- **Web Development:** HTML, CSS, JavaScript, Web-Based Dashboards, Frontend Development
- **Programming Fundamentals:** Java, OOP, DSA, Problem Solving

PROJECTS

GALAXY EXPLORER

- Developed an interactive space-exploration website with **categorized space content** using **HTML, CSS, and JavaScript**.
- Built a **PHP backend** to support user-related functionality and integrated the application with **MySQL** for registered-user data management.
- Designed a **user-friendly and visually engaging interface** with intuitive navigation for an immersive learning experience.

Technologies: HTML, CSS, JavaScript, PHP, MySQL

GitHub: https://vadlakavyasri.github.io/Galaxy-Explorer/

FACE MASK DETECTION

- Developed a real-time **face mask detection system** using **Computer Vision and Convolutional Neural Networks (CNN)** to identify whether individuals were wearing masks.
- Implemented the **Viola-Jones algorithm** for face detection and applied machine learning techniques for mask classification.
- Designed the system to support **automated mask compliance monitoring** during the COVID-19 pandemic.

Technologies: Python, Machine Learning, CNN, Computer Vision, Viola-Jones Algorithm

GitHub: https://github.com/VadlaKavyaSri/Face-Mask-Detection/

ONLINE PAYMENT FRAUD DETECTION

- Developed a **supervised machine learning system** to identify potentially fraudulent online payment transactions.
- Evaluated and compared multiple machine learning algorithms using **performance metrics** to determine the most effective model for fraud detection.
- Designed the solution to proactively identify suspicious transactions and help reduce financial risk.

Technologies: Python, Supervised Machine Learning Algorithms

GitHub: https://github.com/VadlaKavyaSri/Online-Payment-Fraud-Detection.git

CERTIFICATIONS

- Java Full Stack Development - KodNest | March 2025
- MySQL Certification - Udemy | March 2024
- Web Development Internship - InternPe | July 2023 - August 2023
- Web Development Foundation Course - Microsoft, SAP, Edunet Foundation | July 2023

AWARDS

Prime Player Award – AWS Bedrock Team | Amazon - Jan 2025
Spotlight Award – AWS Bedrock Team | Amazon - Sept 2025

EDUCATION

M.Tech in Artificial Intelligence & Machine Learning **2026 - 2028 | Pursuing**

VEMU Institute of Technology, Puthalapattu, Andhra Pradesh

B.Tech in Computer Science and Engineering **2020 - 2024 | CGPA: 8.5**

IIIT RGUKT, RK Valley, Kadapa, Andhra Pradesh
